

Company information

Greeting

Since established in 1962, we have developed trading business (Sales Division) and manufacturing business (Manufacturing Division) as our principal business activities of the company.

The sales division is focusing on providing the industrial machines and the tools used at the factory site of the automotive industry.

The manufacturing division is focusing on production and supplying of the electronic components on automotive glass.

In any course of business, we examine all customers' requests thoroughly and respond straightforward to accomplish the Corporate Philosophy triad, "Customer Satisfaction", "Quality Improvement" and "Originality and Ingenuity".

Likewise, we consider it is important to propose our customers one step further such as eco-friendly products.

We will continue to be the company that provides reliability and satisfaction to all customers. It is our mission to become "A connector for Human and Machines and the Earth" by responding to various needs of customer.

Kozo Okamoto
President
