

Greeting

Since established in 1962, we have developed trading business (Sales Division) and manufacturing business (Manufacturing Division) as our principal business activities of the company.

In April 2010, we made a business succession to Protective instrument division from the company which developed the same business to us, and in October we concluded the marketing contract with LUVATA which is one of the most respected manufacturers of welding electrodes.

We operate in 4 divisions:

- Machines and Tools Div. : supplying the industrial machines and the tools used in the automotive industries.
- Manufacturing Div. : supplying electrical components on automotive glasses and designs and manufactures the automatic assembly machine.
- Protective equipment Div. : supplying products which make great contribution to a variety of the manufacturing environments.
- Welding tip Div. : supplying welding tips especially for automotive application.

The sales division is focusing on providing the industrial machines and the tools used at the factory site of the automotive industry.

The manufacturing division is focusing on production and supplying of the electronic components on automotive glass.

In any division, we manufacture and supply products which are necessary for the manufacturing front-line, and in order to accomplish the corporate philosophy triad, "Customer Satisfaction", "Quality Improvement" and "Originally and Ingenuity", we examine all customers' requests thoroughly and respond straightforward.

Likewise, we consider it is important to propose our customers one step further such as eco-friendly products.

We will continue to be the company that provides reliability and satisfaction to all customers. It is our mission to become "A connector for Human and Machines and the Earth" by responding to various needs of customer.

Kozo Okamoto
President

Think Green Think Environment of Future
